Hotel Room Booking Form — Basic Fields Use Case

Data Modelling & Form Design for a Business Application in Zoho Creator

1. Objective

To design and build a functional “Hotel Room Booking Form” application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real hospitality-industry requirement of collecting and pre-processing room booking requests.

2. Data Model — Field List (Form Builder Palette)

The screenshots below show the sixteen fields modelled for the Room_Booking_Form, grouped into logical sections, as configured in the Zoho Creator Form Builder field list.

Fig. 1 — Room Booking field list (Guest Details through Special Requests)

A screenshot of a 'Room Booking' form. The form has a title bar with a three-dot menu icon and the text 'Room Booking'. Below the title bar is a list of fields, each with an icon and a label. The fields are: 'Permanent Address' (house icon), 'Room Type' (room icon), 'Meal Plan' (plate icon), 'Amenities Required' (checklist icon), 'Special Requests' (document icon), 'Check-In Date' (calendar icon), 'Preferred Check-in Time' (clock icon), 'Agree To Hotel Policies' (checkbox icon), 'Booking Status' (tag icon), and 'Confirmation Sent' (checkbox icon). The list is scrollable, with a vertical scrollbar on the right side.

Field Name	Icon
Permanent Address	House
Room Type	Room
Meal Plan	Plate
Amenities Required	Checklist
Special Requests	Document
Check-In Date	Calendar
Preferred Check-in Time	Clock
Agree To Hotel Policies	Checkbox
Booking Status	Tag
Confirmation Sent	Checkbox

Fig. 2 — Room Booking field list, continued (Room Type through Confirmation Sent)

3. Basic Fields Used and Their Mapping

The table below maps every Basic Field from the Zoho Creator Form Builder palette to its role in the Hotel Room Booking Form, per the assignment specification.

Basic Field	Form Field Name	Purpose	Sample Value
Name	Guest_Name	Captures full name using First/Last name sub-fields	Anitha Selvam
Email	Email_Address	Captures a validated email for the booking confirmation	anitha.selvam@example.com
Address	Permanent_Address	Captures permanent residential address for records/billing	31, Park Road, Coimbatore, TN, 641002
Phone	Contact_Number	Captures a validated mobile number to confirm/coordinate booking	+91 99000 44556
Single Line	ID_Proof_Number	Free-text entry for the guest's ID document number	Aadhaar: 1234 5678 9012
Multi Line	Special_Requests	Free-text remarks for special requirements during the stay	Higher floor, away from elevator, early check-in
Number	Number_Of_Guests	Numeric value, validated, for total guests staying	3
Date	Check_In_Date	Guest's intended check-in date via date picker	02-Aug-2026
Time	Preferred_Checkin_Time	Guest's expected arrival time at the hotel	1:00 PM
Drop Down	Room_Type	Single-select list of available room categories	Deluxe Double Room
Radio	Meal_Plan	Single mandatory selection among mutually exclusive meal plans	Breakfast Included
Multi Select	Amenities_Required	One or more additional amenities requested for the stay	Extra Bed, Airport Pickup, Late Checkout
Checkbox	Agree_To_Hotel_Policies	Acknowledgement of check-in/out and cancellation policies	Checked (Agreed)

4. Form Layout (Section-wise)

Section A — Guest Details

- Guest Name (First Name, Last Name)
- ID Proof Number (Single Line)
- Number of Guests (Number field)

Section B — Contact Details

- Email Address (Email field)
- Contact Number (Phone field)
- Permanent Address (Address field)

Section C — Room & Stay Preferences

- Room Type (Drop Down)
- Meal Plan (Radio: Room Only / Breakfast Included / All Meals Included)
- Amenities Required (Multi Select)
- Special Requests (Multi Line)

Section D — Scheduling & Policy Acknowledgement

- Check-In Date (Date field)
- Preferred Check-in Time (Time field)
- I agree to the hotel's policies and cancellation terms (Checkbox)

5. Validation Rules Configured

- Guest Name, Phone, ID Proof Number, Number of Guests, Room Type, Check-In Date, and Policy Checkbox are mandatory fields.
- Email field: built-in email format validation enabled.
- Phone field: country code format enabled for Indian numbers.
- Number field (Number of Guests): value range restricted from 1 to 6 per room.
- Date field: Check-In Date restricted to disallow past dates.
- Checkbox (Hotel Policies): form cannot be submitted unless checked.

6. Workflow Summary

- Step 1: Guest opens the public form link shared on the hotel's website or booking confirmation SMS.
- Step 2: Guest fills in personal, identification, room preference, and scheduling details across the four sections.
- Step 3: On clicking Submit, Zoho Creator validates all mandatory fields and formats.
- Step 4: A new record is created in the Room_Booking_Report.
- Step 5: An automated confirmation email (using the Email field value) is triggered to the guest once availability is verified.
- Step 6: The front office reviews the report, filters by Room Type and Check-In Date, and prepares the room and amenities ahead of the guest's Preferred Check-in Time.

7. Expected Learning Outcomes

- Understand the purpose and correct use case for each Basic Field in Zoho Creator.
- Learn how to structure a hospitality booking form into logical, guest-friendly sections.
- Practice configuring field-level validations (mandatory, format, and range checks).
- Understand how form field values feed into report views and front-office scheduling workflows.

8. Lab Record — Screenshots

As required for the deliverable, the following screenshots demonstrate: (a) the form in Form Builder with all fields configured, (b) a live preview of the form, and (c) sample submitted records in the report view.

(a) Form Builder view — all fields, sections, and Field Properties (validation, display fields, data privacy)

The screenshot shows the Form Builder interface for the 'Room_Booking_Form'. The central canvas displays the form structure with sections: 'Guest Details' (containing 'Guest Name', 'ID Proof Number', and 'Number of Guests'), 'Contact Details' (containing 'Email Address', 'Contact Number', and 'Permanent Address'), and 'Room & Stay Preferences' (containing 'Room Type', 'Meal Plan', 'Amenities Required', 'Special Requests', and 'Scheduling & Policy Acknowledgement'). A left sidebar lists various field types like Name, Email, Address, Phone, etc. A right sidebar shows the 'Field Properties' for the selected 'Guest Name' field, including validation (Mandatory), display fields (First Name, Last Name, Suffix), and data privacy settings.

Fig. 3 — Room_Booking_Form in Form Builder

(b) Live preview of Room_Booking_Form

The screenshot shows the live preview of the 'Room_Booking_Form'. The form is titled 'Room_Booking_Form' and shows the 'Guest Details' and 'Contact Details' sections. The 'Guest Name' field is split into 'First Name' and 'Last Name'. The 'Contact Number' field includes a country code dropdown set to '+91' and a phone number field containing '81234 56789'. The 'Permanent Address' section includes multiple lines for address and dropdowns for 'City / District' and 'State / Province'.

Fig. 4 — Live preview showing Guest Details and Contact Details sections

(c) Room_Booking_Form Report — sample submitted record

Guest Name	ID Proof Number	Number of Guests	Email Address	Contact Number	Permanent Address	Room Type
Thara N	123456789	45	thara.n@example.com	+918870830410	600023, Canada	Suite
